

Sara Cristina Ferreira

Frontend developer in Paraná, Brazil

ferreirasara1501@gmail.com | [GitHub](#) | +55 41999008804 | <https://t.me/ferreirasara>

Sara's passion for computing began in childhood, leading her to earn a degree in Computer Science. With 6 years of experience in development, she prioritizes automated testing and meticulous code craftsmanship. Proficient in both frontend and backend, Sara's preference is frontend development, especially in a remote setting. Her commitment to excellence and attention to detail make her a valuable asset in creating outstanding user experiences.

📁 Work History

Senior Frontend Developer (Freelancer) | 08/2025 - Present

React

TypeScript

Automated tests

Tanstack Query

Next.js

Nest.js

- Acted as the technical leader for frontend development across multiple freelance projects, defining software architecture, choosing libraries, and setting tool standards.
- Leveraged AI-assisted development tools, integrating GitHub Copilot in VS Code and Gemini to accelerate coding workflows, automate boilerplate generation, and optimize refactoring processes.
- Translated complex Figma mockups into fully functional, responsive, and performance-optimized React applications from scratch.
- Mentored less experienced frontend developers, providing constructive technical feedback and code reviews.
- Took full ownership of critical or blocked tasks to ensure project delivery deadlines were successfully met.
- Implemented comprehensive E2E and unit testing strategies using Cypress and Jest.
- Architected and configured automated CI/CD pipelines to streamline continuous integration, testing, and deployment processes across projects.
- Communicated directly with key stakeholders to align project goals, technical requirements, and delivery timelines in remote settings.
- Demonstrated strong self-management and adaptability by independently prioritizing deliverables across concurrent high-impact projects.

Full Stack Developer / Frontend Lead | 04/2024 - 08/2025 | Wavelight

React

Nest.js

TypeScript

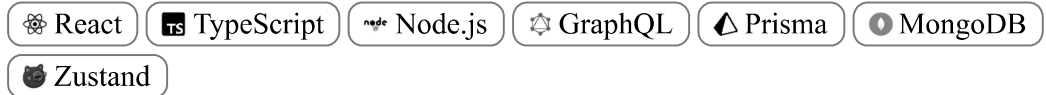

Node.js

MongoDB

Redux

- Served as the primary technical authority for the frontend layer, leading architectural decisions and technology selection.
- Proficient in backend development with Nest.js and frontend development with React.js, building scalable, responsive applications.
- Integrated robust global state management solutions using Redux and Redux Toolkit, improving data predictability and maintainability across complex application modules.
- Skilled in TypeScript to improve code quality and type safety across both layers.
- Experienced with GIT for version control and Jest for unit testing.
- Familiar with Agile methodologies, promoting collaboration and iterative improvements.
- Demonstrated remote work proficiency, maintaining productivity and effective communication in distributed teams.
- Fostered a collaborative team environment by conducting empathetic technical feedback sessions and facilitating knowledge-sharing.
- Cultivated proactive problem-solving strategies, effectively managing technical tradeoffs under tight project schedules.

Full Stack Developer | 05/2023 - 04/2024 | Firefly

- Led the complete overhaul and architectural redesign of the platform's core CRM interface (a complex, high-feature WhatsApp clone), solving critical performance bottlenecks, drastically improving rendering times, and successfully reversing a trend of customer churn.
- Implemented predictable and efficient state management architectures using React Context API and Zustand, streamlining complex data flow and optimizing rendering performance.
- Redesigned full-stack GraphQL architectures, optimizing both backend queries/mutations and frontend state management to achieve significant performance gains and data retrieval efficiency.
- Proactively identified critical UI/UX flaws causing user drop-offs, proposing and implementing definitive design and technical solutions that enhanced overall user satisfaction and workflow reliability.
- Developed intricate chatbot conversation flows and established GitLab CI/CD pipelines to automate testing (Jest), ensuring robust deployment stability.
- Integrated complex third-party CRM and real estate databases using Prisma ORM, implementing scalable pagination and sorting strategies.
- Exercised empathy-driven problem-solving by analyzing user feedback to redesign intuitive workflows and resolve product friction points.
- Collaborated cross-functionally with product managers and designers to align technical execution with overarching business goals.

Frontend Developer | 11/2022 - 04/2023 | Miggos

- Developed high-fidelity Vue components from Figma mockups, implementing Nuxt.js for server-side rendering to optimize application performance and SEO.
- Engineered a custom Shopify application, expanding the platform's ecosystem and integrating secure authentication flows using the Auth0 SDK.
- Customized and styled Storefront UI components via advanced CSS to ensure a cohesive, pixel-perfect branded identity.
- Maintained high code quality and type safety across the application using TypeScript, managing version control seamlessly through Git in an Agile environment.
- Maintained effective asynchronous communication and self-organization in an Agile, fast-paced remote work environment.
- Demonstrated keen attention to detail when reconciling complex design requirements with technical constraints.

Frontend Developer | 06/2022 - 11/2022 | Livus

- Built performance-optimized React components from Figma designs, utilizing Next.js for server-side rendering to enhance user experience and loading times.
- Established a rigorous testing culture by implementing comprehensive unit tests with Jest and end-to-end (E2E) integration tests using Cypress.
- Integrated and customized Material UI (MUI) components with tailored CSS to align perfectly with the project's design system.
- Promoted open communication and constructive peer discussions during daily standups and sprint retrospectives.
- Showcased high adaptability by quickly integrating into an established engineering team and adopting existing codebase standards.

Full Stack Developer | 10/2020 - 05/2022 | Firefly

- Developed dynamic frontend interfaces in React utilizing custom Hooks, and engineered sophisticated backend GraphQL APIs (queries/mutations) for streamlined data handling.

- Implemented database architectures using Prisma ORM and MongoDB, optimizing query performance, pagination, and sorting for large data sets.
- Built complex chatbot conversation flows and automated data synchronization pipelines with external CRM systems.
- Ensured application reliability and scaling through extensive Jest test coverage and codebase-wide TypeScript implementation.
- Strengthened cross-team alignment by actively listening to product requirements and translating business needs into clear technical tasks.
- Exhibited strong time management and accountability in delivering reliable end-to-end features.

Web Development (Trainee) | 12/2019 - 09/2020 | ACOM Sistemas

 SQL  JavaScript

- Designed and maintained SQL Server database structures, including tables, indexes, and complex stored procedures.
- Developed modern screens and functional features for core enterprise systems (ERP, CRM, SCM, CLM) using JavaScript.
- Authored comprehensive API documentation for the SCM ecosystem and managed seamless application deployments via Apache Tomcat.
- Demonstrated a continuous learning mindset, rapidly adapting to enterprise codebases and unfamiliar business domains.
- Effectively communicated technical details through clear documentation and structured reporting to senior developers.

Tester (Internship) | 03/2019 - 11/2019 | ACOM Sistemas

 SQL  Unit tests

- Formulated and executed a multi-layered QA strategy encompassing unit, integration, and functional tests to guarantee software reliability.
- Reviewed and audited internal technical procedures, aligning deployment practices with industry software quality standards.
- Applied critical thinking and meticulous attention to detail when auditing quality processes and edge-case scenarios.
- Collaborated closely with development teams to clearly articulate bug reports and advocate for user experience improvements.

Education

Bachelor's Degree in Computer Science | Universidade Tuiuti do Paraná

- Completed 3,200 hours of coursework with an overall grade average of 8.7/10.
- Achieved a maximum score (10.0/10.0) on the Final Graduation Thesis (Projeto de Graduação II).
- Built strong theoretical and practical foundations in Data Structures, Software Engineering, Human-Computer Interaction, and Software Testing.

Postgraduate Degree In User Experience - UX | Universidade Tuiuti do Paraná

- Completed specialization (10/2023 - 03/2024) focused on User-Centered Design (UCD), Usability Testing, and Information Architecture.
- Mastered user research methodologies, persona creation, wireframing, and interactive prototyping.
- Bridged frontend development with UX principles to design intuitive, accessible, and high-performing digital interfaces.

Languages

Portuguese

- Fluent reading, writing, listening and speaking.

English

- Advanced reading, writing and listening. Intermediate speaking.

👤 **Personal Portfolio** *SDPM*

- Web application developed as final paper. This application is a simulator for page replacement algorithms.
 - *Repository*
 - *App site*

JobHunter

- Web application developed as a personal project. This application is a job search engine that aggregates job postings from various sources and provides a user-friendly interface for job seekers to find relevant opportunities.
